AT&T products and services.....

May I help you??

AT&T Enterprise Options

Enterprise Hosting

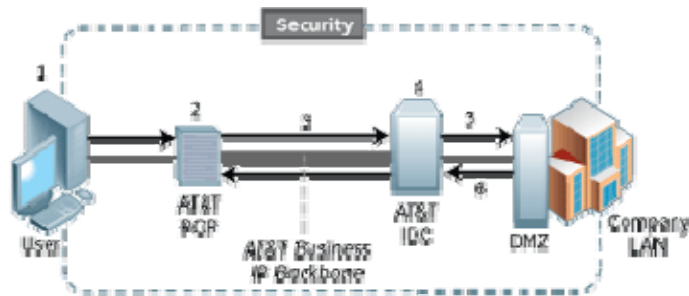

AT&T Enterprise Hosting Services offer a rich portfolio of flexible hosting solutions to help ensure uninterrupted access and improved performance of your critical business data and applications. AT&T Enterprise Hosting Services deliver a fully integrated application and networking infrastructure to handle the simplest to the most demanding hosting requirements, simplifying and streamlining the integration of components from separate vendors. Leveraging AT&T's integrated Global Enterprise Management System (iGEMS), a sophisticated, end-to-end global network management platform, AT&T Enterprise Hosting Services proactively monitor and manage your hosting solution to deliver predictable application performance. AT&T Enterprise Hosting Services further support continuity requirements, delivering an always-on infrastructure and recovery capabilities helping you to restore the networking and application infrastructure quickly if something unexpected does happen.

AT&T's global Internet Data Centers (IDCs) are optimized to provide an industry-leading web, data, and e-business applications hosting environment. Each Internet Data Center is protected from intrusion and failure by multi-layered security, failsafe redundancy, diversity measures, and rapid response recovery measures.

AT&T Enterprise Hosting Services offer a continuum of hosting and management capabilities that provide customers with a global, scalable, reliable and flexible infrastructure - whether AT&T is providing a fully managed hosting solution or you are managing your applications hosted in AT&T's Internet Data Centers.

Description/Diagram

AT&T Enterprise Hosting Services are designed to support your business applications with high performing facilities, comprehensive capabilities and the industry leading portal. AT&T supports a range of monitoring and management options.

- Security, scalability, on-demand capacity and reliability of AT&T's Internet Data Centers
- Industry-leading portal and reporting services for optimum control and visibility
- Proof of service through Service Level Agreements
- Direct connection to AT&T's Global Network backbone

Bundled offers

Save time. Save money. Accommodate shifts in your telecommunications needs. What more can you ask for?

AT&T's bundled offers make managing your communication needs easy by consolidating the contracting, commitment, billing, and discounting for many of the products and services you use every day. And, as an added value, you can manage your day-to-day communication needs through your personalized AT&T BusinessDirect® portal.

Save Time

With AT&T's bundled offers you save valuable time by simplifying management of the telecommunications services you purchase every day. Consolidated contracting, combined billing and convenient eServicing tools all add up to reducing your administrative costs, optimizing your network performance and increasing your productivity.

Save Money

We consider your corporate-wide spending on eligible products and services and reward you with discounts based upon an annual revenue commitment. So when you buy you save, and when you buy more, you save more.

Needs Change. Technology Changes. No Problem.

Build your communications networks your way - with the particular mix of services and capabilities you require - and easily add, drop or modify eligible services as your business needs change.

Learn more about our AT&T bundled offers to get the most out of your AT&T services - every day.

- [AT&T Business Network \(ABN\)](#)

A perfect fit for your business - no matter what the size - if you want greater control over your time, money, and productivity.

- [AT&T OneNet Service](#)

The best choice for large national or multi-national businesses with sophisticated voice and data needs.

AT&T Business Networks (ABN)

With AT&T Business Network (ABN) you can aggregate many of your AT&T Network services into an integrated billing, commitment and servicing approach. Because ABN provides you discounts based on the volume of AT&T network services you purchase, the more you buy, the better value you will enjoy.

Best of all, AT&T makes it easy to manage your ABN plan through our award-winning, secure AT&T BusinessDirect® portal which delivers online tools for efficient, effective, convenient eServicing capabilities, 24x7.

Description

AT&T Business Network (ABN) provides a consolidated approach to billing, discounting and servicing across a comprehensive portfolio of services, including most of our IP, data, long distance, toll-free

and wireless business services. ABN easily expands as your business grows, and helps you effortlessly adapt to shifts in technology.

- **Your Single Solution, Delivered** - Consider ABN a powerful tool - that improves your day-to-day business operations – by helping reduce costs and simplify management of the telecommunications services you use everyday.
- **The More You Buy, the Better Value You Enjoy** - ABN provides discounts based upon the volume of network services you purchase and the term you select – delivering the products and services you want at a better value. And even better, you can also enjoy additional monthly growth incentives as you grow your Business with AT&T.
- **Puts You in Control** – You can easily manage your ABN plan online, any time, day or night, with our secure and personalized AT&T BusinessDirect® portal: view bills, order new capabilities and services, request maintenance and even track the status of trouble tickets.
- **Best of All** - ABN adapts with you as your needs evolve, letting you change your mix of services, without lengthy contract negotiations, keeping you future-ready too.

Why Wait? – With AT&T on your side, you get the innovative technology and support you need today so you can focus on what really matters most – your business.

AT&T One Net Service

If your network demands reliability, world class technologies, and highly responsive service look no further than AT&T OneNet® service.

With AT&T OneNet®, you get all the networking and communications power your company needs – for all locations – under a single, company wide commitment and Master Agreement. OneNet brings you an integrated approach to billing, commitment and service, easily expands as your business needs change, and as an added bonus – empowers you with simplified management.

The advantage? It's much easier than administering dozens of individual providers and contracts. More importantly, you can utilize eligible billing company-wide for much better discounts.

Description

AT&T OneNet is an integrated offer that helps large, mutli-national enterprises combine AT&T's networking and communications capabilities into a consolidated approach to contracting, discounting and servicing.

- **It's Simple** – You select the AT&T OneNet networking services that meet your unique business needs, sign a single set of contracts, and make one overall commitment - eligible services include a multitude of wireless, traditional voice, data, access and internet options.*
- **It's Flexible** - Online, e-management capabilities via our award winning AT&T BusinessDirect® portal provide you greater control of your OneNet communications solution. You can assess the performance of your network, analyze call detail, review, pay, or inquire about your bills, add service, initiate service requests and even make hands-on routing changes to optimize your toll-free network performance.
- **It Provides a Better Value** – Earn substantial discounts thanks to the enterprise-wide view of all your OneNet eligible services – savings far greater than you could earn with individual services from different providers. And as an added time saver, you can add or change services without lengthy contract negotiations.
- **What This Means to You** - Reduced cost, improved administration, simplified management, and a future-ready strategy.

So Get Started Now - Contact your AT&T Account Specialist to learn more about how to enjoy the flexible features and functionality of AT&T OneNet service - today.

*Wireless services are not currently available on AT&T BusinessDirect® and are currently billed separately.
