AT&T products and services.....

May I help you??

MID to Large Business Solutions

Cross-Industry Solutions

We make your business our business

Field Service Automation

Provide better customer service with greater allocation of resources. Enable field-based employees to work more productively through real-time access to work orders, part lists, and other essential back-office information.

AT&T has the experience, expertise, and business processes that are critical to your success. Whether you need wireless access to existing enterprise applications, or a custom- or industry-specific software package, we can deliver the right solution.

Corporate Digital Advantage

Corporate mobility has never been easier than with AT&T's Corporate Digital Advantage

Savings

- Service discounts based on monthly attainment, or minimum annual commitment of service revenue (MAC) and term of the contract
- Business equipment pricing
- Access to special rate plans
- Employee sponsorship program—personal wireless usage for eligible employees applies towards your company's MAC

Flexibility

- Select from a range of business calling plans and equipment models
- 24x7 customer care
- Includes GlobalView, an advanced wireless program for the global corporation

Ease of Use

- Streamlined ordering, activation, and fulfillment across national markets with one dedicated phone number
- Advanced account management software and Web-based tools with AT&T reports, customizable charts, and analysis capabilities

Added Advantages

- Access to AT&T's Premier Enterprise Portal, an online tool to manage your wireless program
- Advanced security features designed to protect corporate and employee information
- Employee access to:
 - Wireless policies and procedures
 - Account information, including many useful reports and tools
 - Wireless product, coverage, and service information
 - Web-based ordering capabilities
 - Online support

Office Reach™

Your solution to Fixed and Mobile Convergence (FMC)

With AT&T's OfficeReach™ service, you can integrate your fixed and wireless voice communications within your enterprise and extend your common dialing plan to your employees' mobile phones. When using call management features with Zoneless Rating, you can ensure that the dollars spent on wireless communication for your organization are for authorized calls.

Cost Effective

- Designate the domestic United States as a single geographic zone to enable economical OfficeReach rates for internal calls
- Call screening to restrict certain calls for users or user groups
- PBX-like functionality without any capital investment in your PBX infrastructure

More Productive

- Abbreviated dialing enables short-cut dialing for both desk and mobile phones
- One Number Service provides a more streamlined method to reach employees and associates
- Bill presentation increases ease of expense submission for reimbursement
- Call screening minimizes potential distractions in and out of the office

Easier to Manage

- Manage employee reimbursement of wireless expenses
- Identify and analyze business calls easily
- Control call restrictions and user groups through a Web-based tool

Quick and Easy Startup

Since OfficeReach is a network service, no special PBX hardware, installation, or license fees are required.

OfficeReach Pricing Packages and Options

Choose OfficeReach Service Plan for ultimate control and management of your wireless expenses, or add OfficeReach Add-On minutes or the specific call management features you want to your employees' existing AT&T Nation plans.
